

Phylogenetic tree showing relationships between various bacterial taxa. The tree is rooted on the left and branches out to the right, corresponding to the rows in the heatmap. The taxa are labeled on the right side of the heatmap.

Heatmap showing the relative abundance of various bacterial taxa across different samples. The color scale ranges from 0.000 (blue) to 1.000 (red). The taxa are listed on the right side of the heatmap.
